

Paraformaldehyde Solution in PBS (Catalog# TBS5083)**DESCRIPTION**

The paraformaldehyde(PFA) Solution in PBS is a high-quality, methanol-free solution formulated in PBS. It has two different concentrations of 4 and 8% solution. It can be used for tissue or cell fixative in IHC and ISH and reversible amine-crosslinking agent for protein and nucleic acid tissue samples.

PRODUCT Concentration

TBS5083-04: 4% PFA in 1x PBS

TBS5083-08: 8% PFA in 2x PBS

APPLICATIONS

Tissue or cell fixation in IHC, ISH processing.

KEY FEATURES

Easy to use: 4% PFA is a ready-to-use formulation for general histology, and 8% PFA is easy to dilute to required concentration with DD-water.

STORAGE CONDITIONS

The product can be stored for 3 months at 0- 8°C from the date of manufacture.

USE DIRECTION

The PFA 8% in 2x PBS can be simply dilute 4% working solution with DD-water in equal volume for general histology processing.

PRECAUTION

It should be operated in hood.
