

DMEM-Glucose-Free Medium
With High glucose, L-glutamine and phenol red, and sodium pyruvate

Catalog	Unit Size
TBS8061GF-500ML	500 mL
TBS8061GF-1L	1000 mL

DESCRIPTION

DMEM (Dulbecco's Modified Eagle Medium) is one of the widely used basal mediums for supporting the growth of many different mammalian cells. DMEM is unique from other media as it contains 4 times the concentration of amino acids and vitamins than the original Eagle's Minimal Essential Medium. Cells successfully cultured in DMEM include primary fibroblasts, neurons, glial cells, HUVECs, and smooth muscle cells, as well as cell lines such as HeLa, 293, Cos-7, and PC-12. We offer a variety of DMEM modifications for a range of cell culture applications.

The medium is modified without glucose, with L-glutamine, phenol red, sodium bicarbonate, and sodium pyruvate. Users can make any suitable modification based on the specific needs of different cell lines.

PACK SIZE

1x 500mL/bottle or 1x1 L/bottle, Store at 2-8°C °C in dark till use.
pH: 7.4 ± 0.2
