

DESCRIPTION

N-2 Supplement is a chemically defined, serum-free supplement based on Bottenstein's N-1 formulation. It is used for growth and expression of neuroblastomas as well as post-mitotic neurons in primary cultures from both the peripheral nervous system and the central nervous system. N-2 Supplement is provided as a 100X concentrate liquid.

MAIN FEATURES

- Support cell growth and expansion
- No animal derived element.
- Compatible to the other brand.
- Easy to make a complete medium with other basal mediums.

MEDIA SIZE AND STORAGE CONDITION

Name	Concentration	Unit Size
N-2 Supplement	100x	5 mL

Storage: $\leq -20\text{ }^{\circ}\text{C}$ in dark
Shelf-life: 12 months

APPLICATIONS

- Differentiation of ES or iPS cells into neuron lineage (neurons and astrocytes).
- Differentiation of neuronal stem cells into astrocytes and neurons.
- Optimal serum free growth for neuroblastomas.

PREPARATION A COMPLETE MEDIUM

Aseptically add 1 part of N-2 Supplement (10x) into 99 parts of a basal medium before use. The final concentration of the N-2 Supplement is 1% (v/v) in the complete medium.

Note: 1) Remaining N-2 Supplement may be aliquoted into working volumes and stored at $-20\text{ }^{\circ}\text{C}$ to $-5\text{ }^{\circ}\text{C}$. Thaw aliquots as needed. Do not freeze-thaw the Supplement more than twice. 2) Once supplemented, the complete medium is stable for up to one week when stored in the dark at $2\text{ }^{\circ}\text{C}$ to $8\text{ }^{\circ}\text{C}$.
