

DESCRIPTION

Tris buffered Saline (TBS) is commonly used as a wash buffer and diluent solution for Western blot, Elisa, and general wash buffer in immunoassay applications.

Some applications need the detergent Tween-20 in the buffer. So, we provide several different formulations with or without Tween-20 in the buffer to make an easy choice for the application.

The buffer concentration and ingredients are listed below:

10x TBS Formulation with Tween-20 (TBS5008T):

1500 mM Sodium Chloride

500 mM Tris-HCl

0.5% Tween-20

Supplied at pH 7.2 - 7.4

DIRECTIONS FOR USE

Simple dilute concentrated TBST(10x) to a 1X solution using ddH₂O.

STORAGE

Store at room temperature.
