

**L-Glutamine Solution 200 mM (TBS8094)**

Catalog	Unit Size
TBS8094	100 mL

**DESCRIPTION**

TribioScience’s L-Glutamine is a vital amino acid used in cell culture media as a major energy source for proliferating cells. Stable as a dry powder or frozen, it degrades quickly in liquid, forming toxic byproducts. For best results, supplement media with fresh L-glutamine before use. Prepared in cell culture-grade water and produced to the highest industry standards. Each lot includes a full Certificate of Analysis and complete formulation details.

**APPLICATION**

Supplementation of cell culture media

**PACKAGE SIZE**

100 mL

**pH:** 5.5 ± 0.5

**STORAGE**

Store at -25°C to -15°C
