

## 100bp Opti-DNA Marker

---

Catalog	Unit
TBS6114	500 $\mu$ l

### Description

PCR products and double-stranded DNA were digested with appropriate restriction enzymes to completion to yield 17 bands, ranging from 50 bp – 1.5 kb, for molecular weight standards in agarose gel electrophoresis. The 200 and 500 base pair bands have increased intensity to serve as quick reference points. Approximated mass of each DNA band is provided (for a loading size of 5  $\mu$ l of the DNA ladder) for approximating the mass of DNA in comparably intense DNA samples of similar size.
