TBS10328-5MG	5 mg

Description

InVivoMAb Anti-Human CCL24 antibody is a monoclonal antibody designed to neutralize human C-C motif chemokine ligand 24 (CCL24). By specifically binding to CCL24, this antibody inhibits CCL24-mediated signaling pathways, thereby attenuating inflammatory and fibrotic responses. It is a valuable research tool for in vivo of CCL24-associated mechanisms in diseases such as primary sclerosing cholangitis (PSC), systemic sclerosis, metabolic dysfunction-associated steatotic liver disease (MASLD), and metabolic dysfunction-associated steatohepatitis (MASH).

Synonyms

Anti-CCL24 antibody, Anti-human CCL24 monoclonal antibody, CCL24 neutralizing antibody, CCL24 blocking antibody, Eotaxin-2 antibody, Anti-Myeloid Progenitor Inhibitory Factor-2 antibody, MPIF-2 antibody.

Product Details

Applications:	ELISA, Neutralization
Species reactivity:	Human
Host:	Human
Isotype:	IgG1
Target:	MPIF2, Eosinophil chemotactic protein 2, Small-inducible cytokine A24, CCL24, Eotaxin-2, SCYA24, MPIF-2, Myeloid progenitor inhibitory factor 2, CK-beta-6, C-C motif chemokine 24.
Uniprot:	O00175
Concentration:	3 mg/ml
Purity:	>95%
Formulation:	Liquid
Storage buffer:	0.01M PBS, pH 7.4.
Purification:	Protein A/G purified from cell culture supernatant.
Clonality:	Monoclonal
Storage:	Store -20°C up to 12 months, and -80°C for long term. Avoid repeated freeze-thaw cycles.
